Everything	Enhanced Windows file searching
7zip	File archive tool
Chainsaw	Automatic event log parser with Sigma
Floss	Strings tool specializing in obfuscated strings
Network Miner	Extract files and create summary from PCAP
Notepad++	Enhanced notepad
HxD	Hex Editor

Automated Installation with Chocolatey

Below is a command that will use the package manager, [Chocolatey](#), to install as many of the above tools as possible. Before using this command, review the licensing for each tool to determine which can be freely used and which need commercial licenses. All of the above are legitimate tools but security tools may alert due to the presence of some of the tools, use caution.

Packages will be installed to C:\ProgramData\chocolatey\lib\ by default.

Note: The full Sysinternals and Eric Zimmerman suites are installed, not just the ones listed above.

```
choco install cyberchef dcode ericzimmermantools exiftool sqlitebrowser  
arsenalimagemounter capa yara plaso sysinternals wireshark fakenet  
browsinghistoryview cports everything 7zip floss network-miner  
notepadplusplus hxd
```
